DETAILED ACTION

1. This action is in response to the following communication: Amendment to application 10/750,624 filed May 2nd, 2007.

Claims 4 – 6 have been cancelled.

Claims 1 – 3 remain pending and being examined.

Applicant's arguments have been fully considered but they are not persuasive. In addition, upon further consideration, of the amended claims, a new ground(s) of rejection is made to reflect now amended claims.

When responding to the Office action, applicant is advised to clearly point out the patentable novelty the claims present in view of the state of the art disclosed by the reference(s) cited or the objection made. A showing of how the amendments avoid such references or objections must also be present. See 37 C.F.R. 1.111(c).

Claim Objections

2. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 112

3. Claims 1 - 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2192

As per **claim 1**, "Software core module object" was changed to "pre-built software core", however numerous references to "software core module object" are made in the last paragraph of the claim, therefore claims 2 and 3 are also rejected for being dependent on a rejected base claim.

Claim Rejections - 35 USC § 101

4. Prior rejection is overcome.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, are rejected under 35 U.S.C. 102(e) as being unpatentable over Bowhill 2004/0015831 published Jan. 22, 2004, and filed Jan. 31, 2001. In regards to claim 1, Bowhill teaches:

producing a custom-developed software package based on customer-designated specifications, comprising: storing a pre-built software core in a storage unit; storing a set of pre-built functional module objects in the storage unit; storing a set of custom-made module objects in the storage unit; (P. 2 & P.3, [0039]). setting options of functional module objects and custom-made module objects that are required by the custom-developed software package (P. 3, [0046], lines

Art Unit: 2192

1 - 9).

in accordance with the set options, gathering the user-selected set of functional module objects and custom-made module objects from the storage unit based on the user-specified custom options, as well as directly gathering the software core module object from the module-storage unit, so as to combine the gathered software core module object, functional module objects, and custom-made module objects into an integrated code package serving as the custom-developed software package (P. 3, [0040], [0041], and [0042]).

In regards to claim 2, Bowhill teaches:

the storage unit include a group of pre-built core functional module objects and a group of custom-made functional module objects (P. 2 & P.3, [0039]).

In regards to **claim 3**, Bowhill teaches:

the storage unit include a group of document file objects, a group of data file objects, and a group of custom-made interface objects (P. 3, [0046], lines 1 – 6), and (P. 3, [0051], lines 3 – 5).

Art Unit: 2192

Response to Arguments

Applicant's arguments with respect to claims 1 – 3 have been considered but are moot in view of the fact that even-though applicant's invention integrates modularized program directly in accordance with custom-made requirements, inherently the same task is accomplished, especially since batch files and script files (modular files) are made for being used for specialized purposes (custom-made requirements), as taught by Bowhill.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Correspondence Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evral Bodden whose telephone number is 571 272 3455. The examiner can normally be reached on Monday to Friday, 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tuan Dam can be reached on 571 272 3695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
